## RSS Specifications

### About this Site

This site is a comprehensive rss reference detailing ***everything you need to know about RSS.***

RSS is defined as Really Simple Syndication or Rich Site Summary. RSS files are formed as XML files and are designed to provide content summaries of news, blogs, forums or website content.

Users select the rss feeds (content) they wish to subscribe. The feeds are generally simple headlines and brief descriptions if the user is interested they can click to see additional information.

please feel free to [contact us](#) to suggest any additional rss resources or rss categories.

*Now, analysts at New Yorks University of Rochester are fighting back with an AI of their own.*

*The team collected about a quarter of a million unique English tweets from between Sept. 23—the first reported incident of hate-code words—and Oct. 18—a week after the second US presidential election debate between Hillary Clinton and Donald Trump.*

*There were some interesting observations that we noted.*
